### PROFILE SUMMARY

Entry-level Python Full Stack Developer with a BCA degree and hands-on experience in building web applications using Django, Django REST Framework (DRF), and React.js. Skilled in developing REST APIs, implementing JWT-based authentication, designing MySQL databases, and creating responsive user interfaces with HTML, CSS, and JavaScript. Experienced in deploying applications on cloud platforms and using Git/GitHub for version control and collaboration. Eager to contribute to scalable application development, clean API design, and reliable software delivery as a Python or Django Developer.

### TECHNICAL SKILLS & TOOLS

- **Language:** Python, JavaScript, HTML5, CSS3, SQL
- **Tools & Platforms:** Git, GitHub, Postman, VS Code, PyCharm, npm, pip, Render
- **Frameworks & Libraries:** Django, Django REST Framework (DRF), React.js
- **Web & API Development:** RESTful API Design, JSON, JWT Authentication, API Integration, CRUD Operations
- **DBMS:** MySQL, MongoDB
- **Concepts:** MVT Architecture, Responsive Design, CORS, Branching & Pull Requests, Agile development
- **Operating Systems:** Linux, Windows
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, VPN basics

### RELEVANT PROJECTS

#### E-Commerce Web Application:

May 2026

*Tools: Django, Django REST Framework (DRF), React.js, MySQL, Git, GitHub, Postman, Render*

- Developed a full-stack e-commerce application using Django, DRF, React.js, and MySQL.
- Designed, developed, and integrated secure RESTful APIs for product catalog, shopping cart, and order management using DRF and JSON-based API communication.
- Implemented JWT authentication, role-based access control (RBAC), and secure user authorization to ensure application security and data protection.
- Built a responsive, mobile-friendly user interface with dynamic product search, filtering, and real-time cart updates using React.js and modern front-end development practices.
- Optimized database schema and query performance using Django ORM and MySQL indexing techniques, improving scalability, response time, and overall application efficiency.

#### Employee Management System:

Jun 2026

*Tools: Django, Django Template, Built in Authentication, MySQL*

- Built a full-stack employee management system using Django and MySQL for HR operations.
- Developed CRUD features with Django views and forms for employee onboarding and record management.
- Implemented user authentication, authorization, and session management using Django's built-in security framework.
- Added search and filtering functionality to improve data retrieval and user experience.
- Designed a normalized relational database and optimized queries using Django ORM to ensure data integrity and better performance.

### EDUCATION

Bachelor of Computer Applications (BCA) - CGPA:7.02/10

2022 - 2025

Science College (Autonomous), Hinjilicut — Berhampur University, Odisha

### LANGUAGES

English | Hindi | Odia
